React.js, HTML5, CSS3, Bootstrap, GitHub, GitLab, VS Code

AI Tools

ChatGPT, Claude, Gemini, Cursor, GitHub Copilot, Antigravity, Windsurf, Lovable, Llama, Hygen

PROFESSIONAL EXPERIENCE

Backend Software Engineer – Yashworld Products Private Limited

May 2024 – Present

Surat, Gujarat

- Develop and maintain production backend services using Node.js, NestJS, TypeScript, MongoDB, PostgreSQL, GraphQL, and REST APIs.
- Design APIs and business workflows for CRM, project management, construction management, property management, attendance, materials, work orders, payments, and reporting.
- Implement authentication, authorization, role-based permissions, and company/branch-level access control.
- Work with MongoDB/Mongoose and PostgreSQL/Sequelize for schemas, queries, relationships, pagination, filtering, and data management.
- Troubleshoot production issues, improve backend logic, and collaborate with frontend developers to deliver reliable features.

SELECTED PROJECTS

HiveStaff – Multi-Tenant Business Management Platform

Node.js, NestJS, MongoDB, GraphQL

Developed backend modules for CRM, clients, projects, permissions, attendance, materials, work orders, reporting, and business operations.

Construction Management Platform

Node.js, NestJS, MongoDB, GraphQL

Implemented workflows for leads, clients, properties, projects, BOQ, materials, labour, machinery, payments, work orders, and project reporting.

Property Management Microservice

Node.js, Express.js, PostgreSQL, Sequelize

Built REST APIs and relational data models for property and project-management workflows.

LaserBliss Clinic Management Platform

Node.js, NestJS, PostgreSQL

Developed modular backend services and database-driven APIs for clinic management workflows.

EDUCATION

Bhagwan Mahavir University, Surat, Gujarat

Bachelor of Computer Applications (BCA)
